## GenAI & MERN Stack Developer

HestaBit Technologies | 3.4 Years Experience | India

### PROFESSIONAL SUMMARY

---

- GenAI-focused MERN Stack Developer with 3.4 years of experience delivering scalable, production-ready web applications and LLM-powered features from concept to deployment.
- Experienced in building GenAI-driven products, including natural-language-to-SQL query engines, prompt-based data pipelines, and structured LLM output integration.
- Expert in building full-stack applications using React.js, Next.js, Node.js, Express.js, and MongoDB with clean, maintainable code.
- Strong command of TypeScript, REST API design, microservices architecture, JWT/OAuth authentication, and async data pipelines.
- Hands-on experience integrating LLM APIs, prompt engineering, and structured output parsing into production backend systems.
- Proficient in performance optimization through Redis caching, async processing, query optimization, and efficient API design.
- Comfortable working in agile, cross-functional teams — delivering AI-enabled features end-to-end across complex multi-platform products.

### PROFESSIONAL EXPERIENCE

---

#### MERN Stack Developer

June 2023 – Present

HestaBit Technologies Private Limited

- Led full-stack development of multiple production-grade web applications using Next.js, Node.js, Express.js, and MongoDB.
- Built and maintained scalable REST APIs and microservices supporting real-time data processing and high-traffic campaign workflows.
- Developed reusable, component-based frontends with Next.js and Tailwind CSS for improved performance and consistency.
- Designed and integrated LLM-powered features, including natural-language query interfaces and prompt-driven data pipelines with structured output validation.
- Implemented secure authentication systems using JWT and OAuth, along with role-based access control across applications.
- Integrated Redis caching, async processing, and cron jobs to optimize backend throughput and reduce latency.
- Collaborated with cross-functional teams to deliver features across analytics dashboards, campaign management, and data platforms.

#### Trainee Developer

Jan 2023 – June 2023

HestaBit Technologies Private Limited

- Developed frontend components using Next.js and contributed to backend API development with Node.js and Express.js.
- Gained hands-on experience with MongoDB schema design, REST API integration, and agile development workflows.

### KEY PROJECTS

---

#### GAIA – Multi-Channel Campaign Automation Platform

Role: MERN Stack Developer | Team: 10

- Built and scaled a full-stack campaign automation platform supporting Meta, Google, LinkedIn, TikTok, and other advertising channels.
- Architected a modular Next.js frontend with reusable components, analytics dashboards, and real-time campaign management workflows.
- Designed and developed robust Node.js/Express.js backend APIs and microservices for campaign management, user handling, and reporting.
- Implemented Redis caching and async processing pipelines to handle large-scale campaign data with high throughput and low latency.

- Integrated third-party APIs, payment services, tracking systems, and data pipelines to support end-to-end marketing automation.

**Technologies:** Next.js · Node.js · Express.js · TypeScript · MongoDB · Redis · AWS · JWT · Microservices · Tailwind CSS · Vite

## Rallar Services – GenAI-Powered Natural Language to SQL Platform

*Role: GenAI & Backend Developer | Team: 4*

- Built an enterprise GenAI platform enabling railway workforce staff to query employee data using natural language instead of SQL.
- Designed prompt engineering workflows to translate natural language input into accurate, structured SQL queries via LLM integration.
- Implemented structured output parsing and validation to ensure LLM-generated queries were safe, accurate, and production-ready.
- Built backend query-processing systems and REST APIs for real-time database access, filtering, and visualization of AI-generated results.
- Created responsive dashboards using Next.js to display employee records, attendance data, and workforce analytics.
- Designed optimized SQL query pipelines and structured data response systems for accuracy and reliability at scale.

**Technologies:** Next.js · Node.js · Express.js · MySQL · LLM Integration · Prompt Engineering · Structured Outputs · REST APIs

## Advida – AI-Powered Advertising & Growth Platform

*Role: Full Stack Developer | Team: 3*

- Contributed full-stack development to an AI-first advertising platform with campaign management across Google, Meta, TikTok, and X.
- Built scalable backend microservices and REST APIs with real-time data processing and async workflows.
- Developed responsive Next.js frontend modules for campaign analytics, budget management, and audience segmentation.
- Integrated third-party ad platform APIs and built data pipelines to support automated, AI-driven campaign optimization.

**Technologies:** Next.js · Node.js · Express.js · MongoDB · TypeScript · REST APIs · Async Pipelines

## TECHNICAL SKILLS

---

**GenAI & LLM:** Prompt Engineering · LLM API Integration · Structured Outputs · NLP-to-SQL · Retrieval-Augmented Workflows · AI-Assisted Development (GitHub Copilot, Claude Code)

**Frontend:** React.js · Next.js · Vite · JavaScript (ES6+) · TypeScript · HTML5 · CSS3 · Tailwind CSS · Material UI

**Backend:** Node.js · Express.js · REST APIs · Microservices Architecture · JWT/OAuth · Async Processing · Cron Jobs · Data Pipelines

**Databases:** MongoDB · MySQL · MSSQL · Redis

**Languages:** JavaScript · TypeScript · Python

**Cloud & DevOps:** Docker · Git · GitHub/GitLab · CI/CD · Azure · AWS

**Tools:** Postman · Swagger · GitHub Copilot · Claude Code

## EDUCATION
